

October 8, 2009

Dear Association Manager:

The new issue of *COMPonents*, State Fund's quarterly newsletter for policyholders, is about to be mailed to policyholders. The theme of the new issue is safety. The newsletter is geared toward helping employers manage a safer workplace so they can better protect employees, preserve productivity, and control workers' compensation costs. Several articles describe loss control products and services State Fund has developed to support the safety of policyholders and their employees.

Policyholders should start receiving their printed copy of *COMPonents* in the mail over the next two weeks. We will also post the newsletter on our Web site after the mailing. You may access your preview issue of *COMPonents* at [www.scif.com/pdf/COMPonents2009issue3.pdf](http://www.scif.com/pdf/COMPonents2009issue3.pdf).

If you have any questions about the newsletter or would like printed copies to share with your members, please contact your State Fund group representative.

We hope you and your members enjoy this issue of *COMPonents*. The next issue, due in mid-November, will be devoted entirely to State Fund's group insurance program.

Thank you for your continued partnership and support.

Sincerely,

*John Barbieri*
